

Hosting without the hassle.

Customers appreciate cloud hosting because it allows them to focus on what matters most – developing innovative solutions that benefit their organizations. Our hosting service – Clarif FileMaker Cloud – includes the performance, reliability you expect from Clarif, without the need to manage server hardware, software, and a network.

Fast and reliable deployment for your custom apps.

Agility and speed.

Deliver super-fast deployment. Set up and share your custom apps in moments, then with a click of a button, increase hardware storage and computing power when your team needs it.

Maintenance-free infrastructure.

No hardware configuration or software installation required. Server maintenance and automatic backups included.

Enterprise-grade security and support.

Robust industry standards to protect your data. Plus, our dedicated 24/7 support ensures security and performance.

Optimized management.

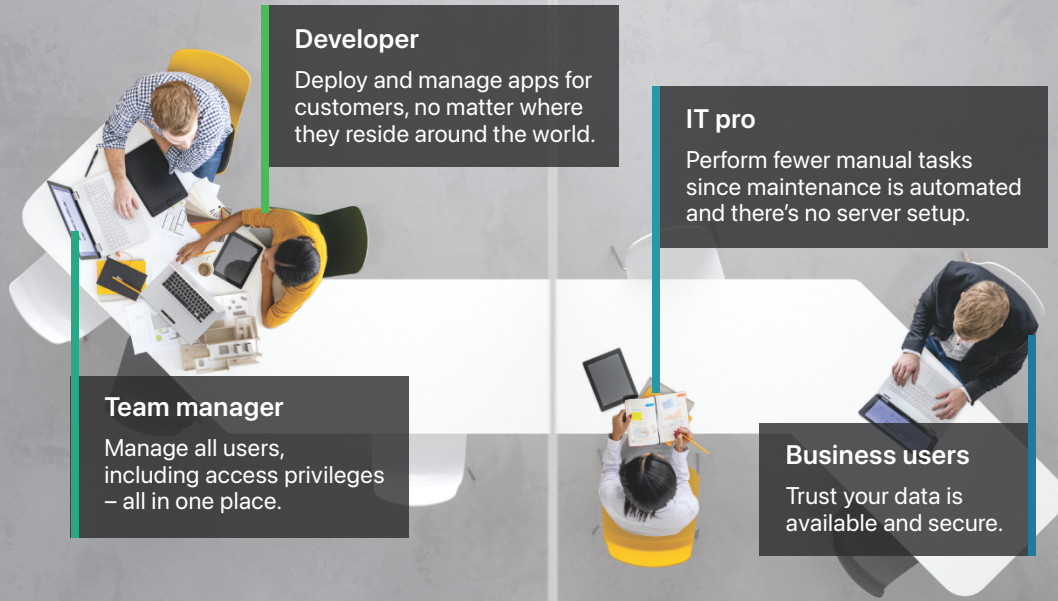

A unified console lets you track and oversee users and groups. Everything is all in one place for maximum visibility.

FileMaker Cloud upgrades.

Licensing for FileMaker Cloud ensures you're receiving our latest technologies. You're always current and using the latest version.

FileMaker Cloud helps your entire team.

Your data is under lock and key.

Security, compliance, and governance are our top priorities. We have all the industry-standard security features in place, including AES 256-bit encryption, SSL, AWS key management, and multi-factor authentication. FileMaker Cloud also achieved successful completion of a SOC 2® Type 2 audit and has achieved ISO certifications for security and privacy. Plus, FileMaker Cloud supports external identity providers and role-based access control.

Seven more reasons to choose FileMaker Cloud.

1.

Long-term return on investment.

By using FileMaker Cloud, your organization saves money year over year since costs for server licensing and on-premise hosting go away.

2.

Ready. Set. Done.

With FileMaker Cloud, you're up and running before you know it. No hardware configuration, and no OS or software installation.

3.

Maintenance on cruise control.

Manage and monitor your apps with a user-friendly console. Data backups and software update notifications are automatic. Even use web services through a REST API to perform admin tasks.

4.

Make it mobile.

Your custom apps are mobile-ready, so you can host apps that run on an iPad and iPhone. Use built-in functionality to instantly run apps in a web browser for mobile access on any device.

5.

One-stop management.

Easily manage your team's accounts, groups, and subscriptions – available in one convenient location. Use the same credentials to access and share multiple apps with a single sign-on system.

6.

Integrate with your world.

With a REST API, share your data in web services and applications. Exchange data with your existing systems using OData, a REST API protocol.

7.

Automate your workflows.

With Clarif Connect, automate workflows and integrate your tech stack. Get **Clarif Connect for free** so you can connect your FileMaker apps with other apps like Slack, Twilio, Outlook, and more.
